PROFILE

With over 6 years of iOS development experience, I've collaborated closely with clients across diverse industries, crafting apps tailored to their unique needs. My journey began at the University Developer Academy, where I honed my skills in Swift and Objective-C, unlocking Apple's ecosystem.

Fueled by curiosity, I'm always exploring the latest advancements and integrating them into my projects.

Adept in Git, well-versed in Scrum methodology, MVVM architecture, and more recently SwiftUI, I thrive in dynamic team environments.

My experience ranges from building social media platforms to food delivery apps and hotel booking solutions—and now extends across multiple sectors through the custom SDKs we create for our clients—consistently delivering results that leave a lasting impact.

KEY SKILLS

- Mobile Software Development.
- Coding & Scripting.
- Software Testing.
- Scrum & Agile Methodologies.
- Continuous Integration.
- Project Architecture.
- Code Review
- Communication Skills.
- Challenge driven.
- Teamwork & Adaptability.
- Flexible & Patient.

WORK EXPERIENCE

Bryj ai

Position: iOS Developer

Period: July/2024 – Currently

Main Achievements:

Maintenance and Improvements of clients application.

Help the development of the internal SDK.

Function description:

The company created an SDK with plugins related to WebView. Clients use the SDK on their apps. The main objective of the SDK is to allow clients to use their website as an App, without the need to develop a separate app for mobile platforms.

Software / Tools:

Worked with Xcode, Swift, JavaScript and CSS.

Worked with GitHub, Git Flow, Bitrise, TestFlight, Internal Frameworks, Code Review.

Carrefour France @Fyld

Position: iOS Developer

Period: June/2023 – June/2024

Main Achievements:

Contributed significantly to the Carrefour Drive iOS app, which reached nearly 100,000 downloads on the App Store.

Reduced release cycle time by 25% by implementing Jenkins pipelines with Quick and Nimble.

Improved app performance and user experience using CoreData, BFF, and architectural patterns (MVVM, VIPER, MVP).

Enhanced app features by integrating SwiftUI into existing UIKit codebase and creating custom Swift Packages.

Function description:

Worked on the Carrefour Drive iOS application, focusing on performance optimization, architecture improvements, and continuous delivery. The role included maintaining the app, building new features, and integrating modern technologies to ensure scalability and an enhanced user experience.

Software / Tools:

Worked with Xcode, Swift, SwiftUI, UIKit, CoreData, Quick, Nimble.

Jenkins, GitHub, Git Flow, Agile methodologies.

Aubay Portugal

Position: IT Consultant

Period: June/2022 – June/2023

Main Achievements:

Mentored junior developers, performed code reviews, and enforced industry best practices. Improved code quality through unit testing, threading optimizations, and refactoring.

Function description:

Acted as an iOS consultant, supporting client projects by providing technical expertise, ensuring high-quality deliveries, and promoting innovation within teams.

Software / Tools:

Worked with Swift, Xcode, MVVM, GitHub.

Arabyads

Position: iOS Developer

Period: April/2021 – December/2022

Main Achievements:

Developed and launched Boostiny, a performance marketing platform connecting advertisers and partners, primarily promoting coupon campaigns.

Function description:

Focused on developing and maintaining Boostiny, ensuring scalability and smooth campaign management for clients in the performance advertising domain.

Software / Tools:

Worked with Swift, RxSwift, MVVM, GitHub, Agile/SCRUM.

Acid Labs

Position: iOS Developer

Period: February/2019 – March/2021

Main Achievements:

Designed, developed, and delivered custom mobile solutions according to client requirements.

Built native applications from scratch, ensuring alignment with client business needs.

Function description:

Delivered multiple mobile projects across industries, leading the development of iOS applications with both Swift and Objective-C.

Software / Tools:

Worked with Swift, Objective-C, React Native, SCRUM.

EDUCATION

Program: Master's in Software Engineering
Institution: Polytechnique Internationale (2019 - 2021)
Location: Tunis , Tunisia

Program: Bachelor of Computer Science
Institution: Faculty Of Economics And Management Of Tunis (2015 - 2019)
Location: Tunis, Tunisia
